Together, We Can!

ABOUT OCEAN:

Introducing Ocean Ceramics, a pioneering venture in the realm of ceramic tiles, proudly established in 2024 on the vibrant landscape of Pakistan. With a vision to redefine elegance and functionality in architectural design, Ocean Ceramics embarks on a journey to deliver unparalleled quality and innovation to its esteemed clientele.

Drawing inspiration from the rich heritage of craftsmanship, Ocean Ceramics is committed to elevating the standards of tile manufacturing in Pakistan. Our extensive range of ceramic tiles encompasses a myriad of sizes and finishes meticulously crafted to cater to diverse aesthetic preferences and practical requirements.

Unlike conventional practices, Ocean Ceramics has invested in state-of-the-art manufacturing facilities strategically located within Pakistan's borders. Spanning over vast acres of land, our cutting-edge factory stands as a testament to our dedication to local production and economic empowerment.

Equipped with advanced SACMI machinery imported from Italy, Ocean Ceramics ensures precision engineering and superior quality control at every stage of production. Our relentless pursuit of excellence extends beyond operational efficiency to environmental sustainability, as evidenced by our adherence to stringent ISO standards including ISO 9001, ISO 14001, and ISO 45001 certifications.

Embracing innovation as our cornerstone, Ocean Ceramics has forged strategic partnerships with global leaders in ceramic technology such as TORRECID. This collaboration enables us to offer an extensive palette of colors, glazes, and additives, thereby unlocking endless possibilities for creative expression in architectural design.

At Ocean Ceramics, our commitment to excellence transcends mere production; it is ingrained in every tile we create and every relationship we nurture. With a steadfast focus on customer satisfaction and market responsiveness, we aspire to become the cornerstone of Pakistan's burgeoning ceramic tiles industry, setting new benchmarks of quality, reliability, and ingenuity along the way.

Our mission:

Our mission is to exceed our customers' expectations by going above and beyond. We believe in enhancing our grasp of quality and providing exceptional service and also becoming a leader in bringing cutting-edge technology to market and serving our consumers with exceptional design and a compelling value proposition, fueled by constant advancements in tile creativity, innovation, efficiency, and customer service.

Our vision:

We believe in the development of lifestyles and in being a globally innovative brand. We strive to set ourselves apart through the services and products we offer. We appreciate long-lasting values creation. We intend to increase our production capacity every year by boosting sales with our organized and scientific plans. We want RokaCeram to be a part of everyone's home.

OUR VALUES

SERVICES

Because all our work revolves around you

We undertake to introduce work methods that optimize the quality of our products, thus guaranteeing total customer satisfaction.

We undertake to assess and analyse your opinions so as to make ongoing improvements.

We undertake to do everything in our power to comply with the deadlines and commitments that we make with you.

OUR VALUES

QUALITY

Guaranteeing excellence

We undertake to select the finest raw materials and to use cutting-edge technologies so as to ensure truly excellent products.

We design and develop our products from the drawing board to production, thereby guaranteeing unique textures and patterns for each piece.

OUR VALUES

DESIGN

Because the difference is patently obvious

We undertake to offer you an endless variety of colours, relief patterns, textures and finishes, ensuring infinite alternatives.

We undertake to be creative, self-exacting, subtle, bold, inventive and idealistic in each and every one of the tiles that we design for you, searching latest trends and finest natural materials.

We undertake to suggest different ways of laying our products, helping you to design settings that are truly unique.

The logo consists of the letters 'O' and 'C' in a tall, thin, white, sans-serif font, positioned centrally on a dark blue background.

Together, We Can!

When Design meets Nature

Stone Mix: a project that blends two stone effects ideal for different architectural spaces.

"When Design meets Nature Stone Mix" embodies the harmonious fusion of contemporary design and the timeless beauty of nature's stones.

This innovative project seamlessly blends two distinct stone effects, each ideal for various architectural spaces, to create a truly captivating aesthetic experience.

By marrying the sleek sophistication of modern design with the organic allure of natural stone, this endeavor elevates interiors and exteriors alike to new heights of elegance and refinement. Whether adorning residential sanctuaries, commercial hubs, or public spaces, the Stone Mix project transcends boundaries, offering a versatile solution that enriches every environment it graces.

2 New technologies

CARVED TECHNOLOGY

Natural materials such as marble and stone are renowned for their intricate reliefs, evident in both texture and graphic representation. CarvedTechnology enhances this natural allure by meticulously synchronizing indented veins, resulting in tiles that exude the utmost realism, replicating the authentic depth and character found in nature's own creations.

CARVED technology intricately synchronizes indented veins, replicating the authentic depth and texture of natural materials like marble and stone.

Through meticulous precision, CARVED technology achieves unparalleled realism, elevating ceramic tiles to new heights of sophistication and aesthetic allure.

3D TECHNOLOGY

3D Technology offers a remarkable capability to emulate the weathered, aged appearance of stone or marble, mimicking the natural process of honing or wearing down over time to achieve a subtle matt finish. This innovative technique adds an authentic touch to ceramic tiles, capturing the timeless beauty and character of aged materials, enhancing the overall aesthetic appeal of interior spaces with unparalleled realism.

Unlocking dimensions beyond the flat, 3D technology crafts immersive experiences with unparalleled depth and realism.

From architectural marvels to artistic masterpieces, 3D technology breathes life into the digital realm, revolutionizing design possibilities.

“Elevate Your Space with Ceramic Tile Decor Design”

Ceramic tile decor design is a versatile and visually captivating way to enhance interior spaces. With an endless array of styles, patterns, and colors available, ceramic tiles offer a creative canvas for personal expression and design innovation. Whether adorning floors, walls, or even countertops, ceramic tile decor design adds texture, depth, and character to any room, transforming it into a unique and inviting space. From intricate mosaics to sleek geometric patterns, ceramic tile decor design allows for endless customization, making it a timeless and stylish choice for both residential and commercial settings. With its durability, ease of maintenance, and timeless appeal, ceramic tile decor design continues to be a popular and enduring option for enhancing the beauty and functionality of interior spaces.

Ceramic tile decor design offers an unparalleled opportunity to infuse your space with personality and style. From elegant mosaics to bold patterns, these versatile tiles serve as both a functional and aesthetic element in interior design. With an extensive array of colors, textures, and finishes to choose from, ceramic tile decor design allows for limitless creativity, enabling you to transform any room into a showcase of your unique taste and vision. Whether you're looking to add a touch of sophistication to a bathroom or make a statement in a kitchen, ceramic tile decor design is the perfect choice for creating a space that is both beautiful and functional.

"Decor ceramic tile designs infuse spaces with artistic flair, offering a blend of intricate patterns and rich colors. They transform any room into a stylish and unique environment, perfect for making a statement."

CUNENE COLLECTION

The CUNENE Collection by Ocean Ceramics captures the essence of the untamed beauty and raw elegance of the Cunene River region. This exquisite collection showcases meticulously crafted ceramic tiles that bring the splendor of natural landscapes into your living spaces. Each tile in the CUNENE Collection is designed with precision, reflecting the intricate patterns and rich textures found in the natural world, offering a perfect balance of rustic charm and contemporary sophistication.

The CUNENE Collection features a palette inspired by the earth's natural hues, including deep browns, warm tans, and subtle grays. These colors, combined with the tiles' unique surface textures, create a visually stunning effect that adds depth and character to any room. Whether you are enhancing a modern living room, a cozy kitchen, a serene bathroom, or an elegant commercial space, the CUNENE tiles provide a versatile and timeless design solution.

Beyond their visual appeal, the CUNENE tiles are built for durability and practicality. Made from high-quality materials, they are resistant to scratches, stains, and daily wear, ensuring their beauty endures over time. Their easy-to-clean surfaces make them an ideal choice for both residential and commercial applications, providing low maintenance and high performance.

The CUNENE Collection by Ocean Ceramics is more than just a tile collection; it is an invitation to bring the natural world into your home. Experience the blend of nature's raw beauty and refined craftsmanship with the CUNENE Collection, where each tile tells a story of elegance and durability, transforming your spaces into havens of style and sophistication.

Industry 4.0 system

Ocean is immersed in a process of digital transformation, which allows us better control our operations at production levels in our manufacturing premises. This has a direct impact on the improvement of our productive efficiency, as well as on the quality we offer to our customers.

Thanks to the implementation of several consulting actions within the frame of the Activa Industria 4.0 initiative, Ocean has set a roadmap for its digital transformation, which is reflected in a set of actions to be undertaken by the company in order to improve its own standards of digitalization and adapt to the necessities of the 4.0 industry.

Ocean also collaborates with the ITC Institute in the development of the TwinXdustry project, in which we are validating and defining a new methodology for the implementation of Digital Twins in manufacturing plants all around the industrial network of the Valencian Community.

The Digital Twin is a key element in the paradigm of the 4.0 Industry, and it is defined as a virtual black print of the manufacturing process, permanently updated as compared to the physical reality at the plant by means of a series of sensors and communication elements.

The digital twin has an array of simulation tools, which enables us to make predictions about the future behaviour of the real manufacturing process.

Eco Philosophy

In 2024, we proudly achieved the "Zero Waste" verification statement for our facilities. This remarkable recognition was awarded by SGS, confirming that we have made significant steps in sustainable practices. This is a true statement to our commitment to the environment and the planet.

This "Zero Waste" environmental certification acknowledges our efforts to minimize waste and maximize resource efficiency. And it is a clear indication that more than 99% of the waste generated at all our facilities is recycled or carefully reused in our production processes. In addition, any surplus waste that cannot be used internally is responsibly handed over to accredited companies, ensuring that landfill disposal is avoided altogether. Furthermore, we have not restricted ourselves to waste management, but have also made great steps in manufacturing products that leave a much smaller footprint on the planet, successfully incorporating some recycled content in their raw materials.

In Ocean we are also known by constant investments in energy efficiency systems, applying the most advanced and efficient technologies, by having atmospheric emissions under control in order to minimize the environmental impact generated during our manufacturing process, by the zero discharge of the waste water generated, and by the quality and long life cycle of our product, and its low environmental impact.

Ocean's commitment to sustainability is perfectly summarized in our philosophy: increase value and reduce footprint. By making more valuable products, we have at the same time reduced our ecological footprint and laid one of the foundations of the circular economy.

Our forests, rivers, oceans and soils provide us with the food we eat, the air we breathe, the water we irrigate our crops with.

Together, We Can!

Symbology

The company Realonda S.A. reserves the right to cancel or modify, fully or partially, any of the models, colours, sizes, references and technical specifications found

within this catalogue, in order to improve the product to the benefit of the customer.

The information & details which appear in this catalogue were compiled up to its edition in September 2023.

Due to the printing processes, the colours of the individual images & settings which appear in this catalogue, are orientative & not always exact.

WALL

Wall tiles are specifically designed for vertical surfaces, such as walls in kitchens, bathrooms, and other living spaces, offering both functional protection and aesthetic appeal.

MATT

Matt surface tiles have a non-reflective finish, providing a subdued, natural appearance that is less prone to showing smudges or fingerprints.

RECTIFIED

Rectified tiles are precisely cut to ensure uniformity in size and shape, resulting in clean, straight edges for a seamless installation.

GLOSSY

Glossy tiles feature a shiny, reflective surface finish that adds brightness and depth to any space, making them a popular choice for bathrooms and kitchens.

GRIT

Grit effect tiles mimic the texture of natural materials such as stone or concrete, providing a tactile surface that adds depth and character to any space.

PUNCH

Punch effect tiles feature raised patterns or designs on their surface, adding visual interest and texture to any space.

REACTIVE

Reactive effect tiles undergo a chemical process during firing, resulting in unique variations and patterns on the surface.

MATT INK

Glossy tiles feature a shiny, reflective surface finish that adds brightness and depth to any space, making them a popular choice for bathrooms and kitchens.
